

DISTILLERS
MALT

PRAIRIE
MALT™

MALTING AND THE NEW FLAVOR FRONTIER

Prairie **DISTILLERS MALT** has the enzymatic power to enhance, not inhibit, the creativity of contemporary craft distillers. Our distillers malt is rich in diastatic power, so it can break down starchy adjuncts in your grist like oats, wheat, corn, and many others. Use Prairie Distillers Malt as low as 5-10% in distilling bourbon or rye. However you decide to use it, Prairie Distillers Malt will take your spirits to the next level.

MALT ANALYSIS
